ABOUT ME

Aspiring Software Developer with experience in React, Django, and Python, passionate about building practical web applications and improving technical skills.

EDUCATION

2024 May -2026 Aug Asia Pacific University	Diploma in ICT specialism Interactive Technology Focused on programming fundamentals and software development, with experience in project design using tools such as Photoshop and Canva. Developed skills in Python, Java (OOP), C++ (Data Structures), and web development using React and Laravel frameworks.
---	--

TECHNICALS SKILLS

Programming Languages	Web Development	Tools	Database	Frameworks
- Python - Java - JavaScript - C++ - PHP	- HTML - CSS - REST API - Responsive Website	- Git - GitHub - VS Code - Figma - Photoshop - Canva	- MySQL - SQLite	- React - Django

2026 May - 2026 Aug Eco-shop Marketing Bhd	Information Technology Intern Provided IT support by troubleshooting hardware, software, network, and system issues; assisted with computer setup, software installation, configuration, and deployment; managed IT requests, user accounts, software licences, and equipment through the company's ticketing system; and assisted in developing internal software solutions, including EZinstall, a Python-based automated software deployment tool.
2024 Aug Asia Pacific University	Devmatch Hackathon Participated in a hackathon to develop a software solution within a limited timeframe, contributing to the planning, system design, development, testing, and debugging process while collaborating closely with team members to identify requirements, solve technical challenges, and deliver a functional prototype within the given deadline.
2023 Nov -2024 Apr Camcote Marketing Sdn Bhd	Store Keeper Managed daily store operations, including inventory tracking, organization, and material handling to support smooth production and delivery processes. Collaborated with logistics and procurement teams while developing strong attention to detail, time management, and teamwork skills.

PROJECT

Calendar Prototype React Django REST Framework SQLite Developed at 2026	A full-stack Event Management System prototype built with React and Django REST Framework. The frontend provides an interactive calendar for viewing events and registration. The backend handles event data, registrations, validation, and scheduling logic.
EZinstall 2.0 Python CustomTkinter Winget Developed at 2026	Developed a Python desktop tool to automate software installation. Built a GUI and integrated Winget for application deployment. Packaged the application using PyInstaller.
