Soft Skills

- Problem-solving
- Critical thinking
- Team collaboration
- Willingness to learn
- Responsibility

Technical Skills

- Web Development
- Python
- OOP concept
- Github
- Customthinker

Education

- Kwang Hua High school 2018 - 2023
- Diploma in ICT specialism interactive technology
Asia Pacific University 2024-2026
CGPA: 3.48

About Me

Information Technology graduate specializing in Interactive Technology with hands-on experience in system support, process automation, and software development through internship projects. Passionate about Python development and building practical solutions that improve workflow efficiency and solve real-world problems.

Experience

- **Class representative** 2025/8-2025/11
Asia Pacific University
 - Coordinated communication between lecturers and students and handled class administrative updates to ensure process consistency.
 - Improved organizational awareness and teamwork coordination in a structured environment.
- **Devmatch Hackathon** 2024/9
Asia Pacific University
 - Participated in a hackathon focused on rapid system development under time constraints.
 - Collaborated with team members to design and implement functional solutions.
 - Practiced problem-solving and basic software development workflow in a competitive environment.
- **IT Intern** 2026/5-2026/8
Eco Shop Marketing Bhd
 - Supported IT operations including system troubleshooting and internal user support
 - Assisted in software setup and configuration for internal systems
 - Collaborated with senior IT staff to understand system structure and operational processes

Project

During my internship, I developed EZInstall, a Python-based desktop application that automates software deployment for new Windows computers.

This project, along with my other software development projects, is available on my GitHub and Portfolio. The links are provided below.
